

17 series solar container lithium battery pack protection 40a

Overview

Daly 17S 60V 40A is a Lithium Battery Protection Board (PCM BMS) for balance charging. It uses an A-level protective integrated circuit IC. Its high load capabilities and 40A continuous discharge current performance make it a reliable solution for battery packs. This BMS provides comprehensive protection, ensuring the safety, efficiency, and longevity of your battery in various applications, including electric. The latest version announced at the end of 2023, early 2024 made significant improvements in energy density from 180 up to 205 /kg without increasing production costs. [PDF Version] How much power does a lithium iron phosphate battery have?

Lithium iron phosphate modules, each 700 Ah, 3. Main parameter (Short-circuit description: The short-circuit current is less than the minimum value or higher than the. The Smart BMS Li-ion 17S 60V 40A Common Port with Balance is a high-performance battery management system designed for 17-series lithium-ion (NMC/LiPo) battery packs with a nominal voltage of 60V.
