

305w solar panel size

Overview

A 305 watt solar panel is a photovoltaic module capable of producing 305 watts of power under Standard Test Conditions (STC). These panels typically feature 60-cell monocrystalline or polycrystalline configurations and measure approximately 65" x 39" in size. These mid-range panels, which were once considered high-efficiency options, now occupy a unique position as the industry has largely transitioned to higher wattage.
