

How long does it take to convert the equipment battery cabinet

Overview

With the rise of oil prices and the call to reduce carbon emissions, electric motorcycles and lithium ion motorcycle battery are becoming more and more popular. However, in the actual use process, it may be limited by long charging time, range. The battery swapping station takes the battery swapping cabinet as the main carrier, which allows users to put the battery that has been used up into the cabinet and get a fully charged battery. This battery swap station is mainly designed for the users of. As mentioned above, the solution of the battery swap system depends on the local situation, also the actual situation and the needs of the agents. TYCORUN ENERGY can provide customized battery swapping system products according to the specific situation and. The swapping station can solve the problems of slow charging, difficult charging, and unsafe charging of electric motorcycles, greatly. ● Hardwares: battery swapping cabinet (cabinet itself, touch screen, camera.), battery, charging system, IC card. ● Softwares: control platform.
