

# How long is the value preservation period of outdoor solar power hub

## Overview

Most manufacturers guarantee that panels will retain at least 80-90% of their original output after 20-25 years. For example, a typical performance warranty might guarantee: Production guarantees are promises from installers about the actual kilowatt-hours (kWh) your system will. End-of-life management for photovoltaics (PV) refers to the processes that occur when solar panels and other components of a PV system (racking, inverters, etc. While solar energy systems are built to withstand decades of outdoor use, the right warranty coverage assures extra peace of mind by protecting your investment against potential malfunctions, damage, or underperformance. Far too often though, solar system owners are not achieving the full potential value. Huawei provides customers with a warranty service, which is a maintenance guarantee or quality assurance (QA) service, to ensure product quality within a specified period. If any product quality defects occur during the warranty period, Huawei will provide free services based on the specified.
