

Is solar panel power generation allowed in any country

Overview

If you are wondering, is plug-in solar legal where you live, the answer is generally yes — it is officially permitted in all major EU markets and most US states. In 2021, solar power accounted for 3. 6% of global electricity generation. A percentage that is set to increase rapidly as we inch closer to an ambitious target to hit net zero emissions by 2050. In this article, we explore solar schemes and regulations in the top solar-producing countries as well. Solar energy laws encompass various regulations, policies, and incentives governments implement to promote solar power systems' development, installation, and utilization. 9 TW of cumulative installed capacity at the end of 2025, with 605 GW added in a single year — the largest annual addition in history (IEA). However, localized guidelines determine your wattage cap, registration steps, and utility notification rules.
