

Mobile app with push notification for solar maintenance in Nigeria

Overview

WiGo is a hybrid prepaid solar electricity app that enables users to register and sign in to buy prepaid solar electricity tokens, recharge remotely, view electricity top-up history and view solar performance. Digital innovation—ranging from remote monitoring to satellite IoT—offers a powerful pathway to reduce maintenance costs, improve uptime, and increase project bankability. This article draws on open-access scientific sources, Nigerian case studies, and international toolkits to highlight the most. Take control of your solar energy system with the Monitor My Solar app! Whether you're at home or on the go, this app gives you the power to monitor and manage your solar inverter in real-time, offering an intuitive and seamless experience tailored to your subscription level. No more worry about scheduling. Pending tasks and productivity. Develop a Scheduled Maintenance Alert app for solar industries using Clappia's low-code/no-code platform. For solar industries, maintaining optimal functionality of solar panels and related equipment is crucial for sustained performance. Push notification platforms provide the infrastructure to create, send, and manage such notifications across various operating systems and browsers. Nigeria is a West African country.
