

# Myanmar manufacturers of solar batteries

## Overview

A solar battery is a device that is charged by a connected solar system and stores energy as a backup for consuming later. Users can consume the stored electricity after sundown, during peak energy demands. Using a solar battery can help users to reduce the amount of electricity they would normally buy. The capacity of a battery is about the total amount of electricity it can store in terms of kilowatt-hours (kWh). The power rating, on the other hand, is a battery's electricity delivery at one ti. The life of solar batteries naturally degrades over time, and this is why it is crucial to know the expected lifespan of the solar battery before buying. A battery's lifespan is generally measur. The most popular for energy storage, lithium-ion batteries have the longest lifespan. These batteries are also quite compact and light compared to other battery types. Th. Lead-acid batteries are the cheapest and come with the shortest lifespan and capacity. These are a good option if users want to have a battery storage system on a budget. However.
