

Solar energy policy belgium

Overview

Flanders offers premiums up to €750/kWp for residential systems. Wallonia provides tax deductions and green certificates. Net metering (saldering) remains available but is being phased toward prosumer tariffs. The policy aims to balance three main objectives: reducing energy consumption, expanding reliable energy capacity and enhancing the competitiveness of the Belgian industry, which faces high energy prices. Key elements of the future energy policy include: European cooperation: Belgium recognises the. Solar energy in Belgium costs €1,300–€1,700/kWp installed. Outlining the Belgian plan for achieving its 2030 energy and climate targets, the final updated plan provides revised projections that mark some improvements compared to the draft updated. The Solar Energy Plan 2025 is taking shape for Belgium's energy transition: the mandatory installation of solar panels for large energy consumers. Th regarding the performance.
